

DecisionMesh – Enterprise Deployment Plan (v3)

Core Architecture Summary

Global SaaS, multi-tenant architecture with no single point of failure (SPOF). Frontend on Vercel, backend on dual VPS, PostgreSQL replication, Zitadel managed authentication, hybrid payments (Razorpay + Stripe), multi-LLM BYOK + simulation.

Appendix A: Subscription Plans

- 1 Free Plan: Simulation mode, BYOK allowed, strict limits
- 2 Pro Plan: \$10 / █800 per month – limited LLM usage, workflows
- 3 Team Plan: \$29 / █2500 per month – multi-user, APIs, higher limits
- 4 Enterprise Plan: \$99+ / █8000+ per month – SSO, SLA, compliance, audit logs

Appendix B: Profitability Analysis

Phase 1 (Zitadel Free Tier):

- 1 Fixed cost: ~█1,165/month
- 2 Break-even: ~3–5 paying users
- 3 Early profit achievable quickly

Phase 2 (Zitadel Paid ~█8,000/month):

- 1 Total cost: ~█9,000/month
- 2 Break-even: ~12 Pro users (\$10 each)
- 3 Sustainable SaaS economics

Growth Scenario:

- 1 50 users → ~█40,000 revenue
- 2 Costs ~█15,000
- 3 Profit ~█25,000/month

Appendix C: Why Move from Keycloak to Zitadel (Free Tier First)

- 1 Eliminates Single Point of Failure (managed HA)
- 2 Removes DevOps overhead (no DB, scaling, patching)
- 3 Built-in multi-tenancy (organizations model)
- 4 Faster go-to-market for SaaS
- 5 Free tier supports early-stage growth (0 cost)
- 6 Better alignment with global SaaS architecture
- 7 Easier compliance readiness (GDPR, SOC2 mindset)

Keycloak remains suitable for enterprise self-hosted scenarios, but Zitadel provides better cost-efficiency and operational simplicity for early and growth stages.

Appendix D: Hybrid Auth Strategy

- 1 Default tenants → Zitadel Cloud (shared, scalable)
- 2 Enterprise tenants → dedicated auth (SSO, custom IdP)
- 3 Unified identity model across all users
- 4 No migration complexity between tiers

Appendix E: Final Recommendation

Use Zitadel Free Tier for all users initially, scale to paid tier as revenue grows. Combine with BYOK LLM strategy and hybrid payment routing for optimal cost control and profitability.
